Skills

- JavaScript
- React
- HTML5
- CSS3
- Git
- MongoDB
- NoSQL
- React Native

About

Web developer with a background in customer service and retail. Experienced with project management, time allocation, team communication, adaptability, and problem solving. Have primarily worked with JavaScript and React to build web applications. Always willing and eager to learn new technologies.

Development Experience

Tone.js Synthesizer

A browser based, monophonic synthesizer built for desktop with Tone.js and p5.js. Features include:

- Play notes with your computer keyboard
- Choice between 8 note ranges
- Choice between 4 waveforms (sine, triangle, sawtooth and square)
- ADSR amplitude envelope for shaping the sound

React Movie App

A single page application built with React that relies on a self built RESTful API for the backend. Features include:

- Register an account, login, update profile and delete account
- View a list of 10 movies with a description and info about the director and genre
- Add or remove movies to a list of favorites

Movie API

A RESTful API that contains information about 10 movies and stores user information built with Node.js, MongoDB and tested using Postman.

Education

Career Foundry Full Stack Immersion Course (11/2021 - 08/2022)

An online bootcamp course that uses a project oriented curriculum to teach the core concepts of web development. Throughout the course, I built an application that communicates with an external API, an API of my own, a React movie app, an Angular movie app, and a React Native chat app.

Cedarville University (08/2011 - 05/2012)

I completed my freshman year as a music major with a focus on audio engineering.

Work Experience

Sales Associate, H&M — 2019-2022

- Customer assistance with checkout, questions, and inventory checks
- Merchandise sorting, pricing, stocking

Sales Associate, Target Corp — 2016-2018

- Prepaid / Contract mobile phone activation and troubleshooting
- Execute sales floor resets based on detailed schematic documents
- Delegation of daily tasks and overseeing projects for team members
